To Whom It May Concern:

It is my sincere pleasure to recommend the quality laundry services of Aqua Systems. During the past ten years, Environmental Services Department Supervisor has worked directly with Dana Nafziger, owner of Aqua Systems on laundry services. The company offers unparalleled quality, integrity and workmanship. Across the board, we have always been pleased with the professional manner in which they conduct their daily business.

Aqua Systems exemplifies outstanding communication skills, constantly providing service updates. Their organization, reliability and unique understanding of the laundry industry have been crucial in our partnership. Our healthcare district has 76,000 pounds of linen monthly and Aqua Systems has helped us resolve many of our stain issues. Our quality of linen has never looked better and Aqua Systems has been a great partner in business.

Please consider Aqua Systems for your future laundry services needs. I confidently recommend them to your organization.

Respectfully,

Deanna Hall
